The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a clamping device as claimed that specifically include jaw members having an insulated outer surface with convex, opposed and facing mating surfaces wherein each mating surface has a central peak and the central peak of the first jaw being aligned with the central peak of the second jaw, first and second electrically conductive ablation members that provide electrical current along the central peaks and a thermocouple disposed on one of the mating jaw members as recited in claim 1. The prior art also does not teach or suggest a tissue grasping apparatus as claimed that specifically includes first and second jaws that have a conductive ablation member and a receding clamping surface that defines a surface of varying distance from the conductive ablation member and at least one thermocouple disposed on one of the jaws as recited in claim 4. Lastly, the prior art does not teach or suggest a tissue clamping device comprising first and second jaw members that each have a single electrode generally centered on the respective jaw and a temperature sensor laterally spaced from the electrode such that the temperature sensors are on opposite sides of the electrodes when the device is in the clamped position as recited in claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
